Solutioning

Dial up the right fit and achieve an unprecedented level of control and visibility in managing your revenue cycle. Boost your financial success by implementing unique performance improvement solutions delivered through the Access Healthcare Best Practice Engine.

Achieving excellence in Revenue Cycle Management requires far more than labor arbitrage offered by most offshore and Business Process Outsourcing partners. Leverage the Access Healthcare best practices engine to relieve costly onshore labor costs across some or all of RCM disciplines. Accelerate cash flow while freeing up resources so you can help your clients create better patient experiences and grow your business.

We understand That Dental Revenue Cycle Management requires:

1. Strong understanding of reimbursable/covered procedures based on the patient's health coverage
2. Effective eligibility verification to determine patient liability upfront
3. Effective creation of UCR (Usual, Customary and Reasonable) fee schedule to optimize revenue and reduce denials
4. Identify trends and opportunities to mitigate revenue leakage
